SUMMARY

Computer Science First Years Background with Front and Back End Knowledge to build and design a great user experience on the web. Earning my certificate at the University of Birmingham Boot Camp in Web Development, I have used these skills and paved my way into becoming a professional Junior Developer. With each project I do, I aim to do my best and even learn along the way. I believe what is important is Teamwork as I have worked in teams of 2-3 creating projects using a range of softwares such as Github, Heroku, Visual Studio Code etc.. I am really eager to put myself out there and start designing more creative projects using different coding languages and finding out different ways to get to the same solution.

TECHNICAL SKILLS

Languages: HTML5, CSS, Javascript, Node.js, Express.js, Handlebars.js, MongoDB, MySQL, React.js
Applications: Visual Studio Code, Insomnia, Github, Git Bash, Microsoft Office, Google Docs, Heroku

PROJECTS

Market Watch |
https://github.com/arjunkhakh/Market-Watch |
https://arjunkhakh.github.io/Market-Watch/
- An application designed for the user to look at Companies Current Price In Stock and related Company News! I did this project with a Partner and we used HTML, CSS (Tailwind) and Vanilla JS (With hints of JQuery).
- My Core Responsibilities were mainly doing the JS side of the application while my partner had worked on the Design Aspect.
- HTML5, Tailwind CSS, Javascript

Weather Dashboard |
https://github.com/arjunkhakh/Check-If-The-Weather-Is-Bright-or-Blight |
https://arjunkhakh.github.io/Check-If-The-Weather-Is-Bright-or-Blight/
- An application designed for the user to look at the weather in a chosen city with a 5 day forecast.
- This project was solely created by myself so I was responsible for everything made on this application
- HTML5, CSS, Javascript (JQuery and Vanilla)

Online E-Commerce For The Latest TechnoLovers |
https://github.com/arjunkhakh/Online-E-Commerce-For-The-Latest-TechnoLovers |
- An application designed for the user to make GET, PUT, CREATE, DELETE Requests in an E-Commerce API.
- This project was solely created by myself so I had created the models, controllers and routes for this API.
- Express.js (Router), Node.js, MySQL (Sequelize), Insomnia

**Energy Refined |
https://github.com/arjunkhakh/Energy-Refined |
https://energy-refined.herokuapp.com/**

- An application which the user can view Renewable Energy Products. Users can sign in and view the products and Create/Delete Products for other users to view.
- In this project, my partner and I created this together and gave each other the same responsibility and tasks to design and create this application from the Front End and Back End.
- HTML5, CSS, Bootstrap 5, Express.js, Node.js, Handlebars.js, MYSQL/Sequelize, Winston (NPM Package that is used as a logger for the server).

EDUCATION

Boot Camp Certificate: University of Birmingham, Nov-21 - Jun-22
A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handelbars.js, and ReactJS.

FUTURE PLANNING

Computer Science Degree: Aston University - Sept 2017 (First Year Only)

Computer Science Degree: Birmingham City University - Sept 2022 (To Do Second/Third Year)
